SUMMARY

Frontend Developer with 3+ years of experience building responsive, high-performance web applications with React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3 and Tailwind CSS. Ships production frontend for 11 client brands at IInfotanks and has delivered the UI for 5+ website revamps. Focused on reusable components, REST API integration, Core Web Vitals and cross-browser compatibility.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP

React: React Hooks, Context API, Reusable Components, REST API Integration

Mobile: React Native, Expo, Firebase

Backend: Node.js, Express.js, MongoDB, JWT Authentication

CMS: WordPress, Elementor, ACF, HubSpot CMS (HubL), OpenCMS

Performance and SEO: Core Web Vitals, Lighthouse, Lazy Loading, Code Splitting, JSON-LD Schema

Tools: Git, GitHub, Figma, VS Code, AWS, Vercel, Netlify, Google Tag Manager

Practices: Responsive and Mobile-First Development, Cross-Browser Compatibility, Accessibility, Agile

EXPERIENCE

Web Developer

IInfotanks, Bengaluru, India | May 2025 – Present

- Build and ship production features for 11 client brands across WordPress, HubSpot CMS (HubL) and .NET platforms, working in a fast, multi-team release cycle alongside design, content, SEO and QC.
- Translate Figma designs into responsive, pixel-accurate interfaces for desktop, tablet and mobile, backed by a library of reusable React.js and Elementor components.
- Delivered the frontend for 5+ end-to-end website revamps, owning component architecture, staging, migration and launch from design handoff to go-live.
- Implement JSON-LD structured data and technical SEO foundations so client sites are discoverable in both Google and AI search engines.
- Speed sites up with lazy loading, code splitting, caching and asset optimization, using Core Web Vitals and Lighthouse scores as the benchmark.
- Helped recover and secure a hacked WordPress site by removing web shells and rogue admin accounts, updating plugins and core, and adding 2FA, a firewall and file-integrity monitoring.
- Integrate REST APIs and work closely with designers, writers, SEO and QC in an Agile setup, resolving QC feedback on live releases quickly.

WordPress Developer

Digital Flame Marketing Solution Pvt. Ltd., Pune, India | Apr 2024 – Jan 2025

- Built responsive, SEO-friendly websites for clients using WordPress, Elementor, HTML5, CSS3 and JavaScript.
- Designed mobile-first layouts that behaved consistently across browsers and devices.
- Customized themes, layouts and plugins to fit each client’s requirements.
- Improved load times and Core Web Vitals through image optimization, caching, script optimization and deferred loading.
- Set up Google Analytics and Google Tag Manager so clients could track traffic and conversions.
- Looked after several client websites, keeping each one fast, responsive and accessible.

WordPress Developer
Guest Blogging Pvt. Ltd., Indore, India | Jan 2023 – Jun 2023

- Built responsive WordPress websites with Elementor, HTML, CSS and JavaScript based on client briefs.
- Improved performance, Core Web Vitals and on-page SEO through caching, image optimization, semantic HTML and responsive layouts.
- Managed themes, plugins, updates and day-to-day site maintenance.

PROJECTS

Naimo – Quick-Commerce Delivery App
Tech Stack: React Native, Expo, Node.js, Express.js, MongoDB, Firebase, AWS **|** **Link:** https://naimo.in

- Built a cross-platform iOS and Android app with separate flows for customers, vendors, delivery partners and admins, published on the App Store and Google Play.
- Implemented phone OTP login and push notifications with Firebase Auth, Cloud Messaging and App Check.
- Added location features with expo-location and GeoJSON-based service areas, plus a quick-commerce style location picker.
- Cleared review on both stores, resolving rejections on App Tracking Transparency, account deletion and photo permissions.

Developer Portfolio – React 19, Vite, GSAP
Tech Stack: React 19, Vite, GSAP, CSS3, Bootstrap **|** **Link:** https://100rav.netlify.app

- Built a manga-themed single-page portfolio in React 19 and Vite, organised into reusable section components.
- Created scroll-driven animations with GSAP ScrollTrigger and SplitText, plus 3D CSS transforms for the project showcase.
- Made it responsive and mobile-first, with an accessible mobile menu (focus management, Escape to close, scroll lock).

Nakama's Set Sail – Travel Journal Web App
Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT **|** **Link:** https://set-sail-nakamas.vercel.app

- Full-stack MERN app with JWT authentication, protected routes, CRUD trip entries, image uploads and live weather API data.

Weatherly – Weather Forecast App
Tech Stack: React.js, REST API **|** **Link:** https://weathering-with-clouds.netlify.app

- Real-time weather search with API error handling, loading states and conditional rendering.

CERTIFICATIONS

- Front End Web Development – Coding Ninjas, Aug 2023
- Back End Development – Coding Ninjas, Aug 2023
